info@bearingdepot.co.uk

Bearing Depot recognises the critical importance of cybersecurity in today's fast-changing business environment. Every organisation faces a wide range of potential threats, including:

- Hijacked systems
- Stolen credentials
- Rogue insiders
- Ransomware and malware
- Fraud attempts
- Compliance failures

Alongside these external risks, we are also mindful of the potential for human error, such as unintentional security breaches caused by employee inexperience or lack of awareness.

Our Cybersecurity Measures

To safeguard our business, customers, and suppliers, we work closely with a trusted IT services partner who delivers enterprise-level IT security solutions. Their cyber defences provide a highly protected environment that helps prevent attacks and protect against potential disruption.

Our IT security measures are designed to safeguard:

- Company finances
- Business identity and reputation
- Confidential customer and supplier data
- Internal communications and operational systems

This ensures that we maintain the highest standards of data protection and business continuity.

Ongoing Monitoring & Threat Prevention

Cyber threats evolve constantly, which is why we hold regular reviews with our IT partners to assess new risks and adapt our defences accordingly. This proactive approach ensures we remain resilient against the latest criminal tactics in the digital world.

Our Responsibility to Stakeholders

At Bearing Depot, we take our responsibility seriously. By investing in strong cybersecurity strategies and working hand-in-hand with IT specialists, we are committed to:

- Protecting our company, employees, customers, and suppliers from cyber threats.
- Minimising the risk of financial, reputational, or operational damage.
- Ensuring compliance with industry standards and regulatory requirements.

Summary

Cybersecurity is at the heart of how we operate. By combining expert IT partnerships with a proactive approach, Bearing Depot safeguards the trust of our customers, suppliers, and employees against the ever-changing threat of cybercrime.
